

Imam Safawi Ahmad, M.Si

Lecturer

S.Stat (Statistics – ITS), M.Si (Statistics – ITS)

RESEARCH INTEREST

Spatial Econometrics,
Econometrics, Data
Analysis, Time Series
Analysis

PUBLICATION

- Forecasting of monthly inflow and outflow currency using time series regression and ARIMAX: The Idul Fitri effect. (IACE, 2015)
- Configuring calendar variation based on time series regression method for forecasting of monthly currency inflow and outflow in Central Java . (IACE, 2015)
- Spatial Simultaneous Equation Model:Case Study Empirical Analysis of Regional Economic Growth in Central Java Province, *International Journal of Applied Mathematics and Statistics* 53 (5): 130-139, 2015.

Imam Safawi Ahmad obtained his undergraduate and Master graduate in Statistics from ITS Surabaya under supervision Drs. Kresnayana Yahya, M.Sc. on Marketing research analysis topic (undergraduate), Dr. Setiawan and Dr. Sutikno on Spatial Simultaneous topic (Master graduate), that presented on Konferensi Nasional Matematika (KNM) XVI in Padjajaran University and International Conference on Statistics and Mathematics (ICSM) 2014.

He is currently working in his studies of econometrics, particularly about spatial analysis and extends his studies area in forecasting analysis. He has presented time series analysis topics with another author in **Innovation and Analytics Conference and Exhibition (IACE)** Kedah Malaysia, 2015, who held by University of Utara Malaysia (UUM).
